

# unit CONTROL 660 mobil

Universal mobile hydraulic- and pneumatic-diagnosis-measuring system for service, development and quality control

**The measurement device and the appropriate sensors are capable for automatic sensor identification**

## HARDWARE SUMMARY

- Fast 24-bit A/D-converter
- 5,7" VGA-Display, sunlight viewable
- Rugged case
- Rechargeable battery Ni-MH 10Ah
- Battery monitoring
- Dimensions: W220xH260xD60mm
- 6 Analog inputs (0/4...20mA)
- Therefrom 3 switchable to Digital
- RTCC (RealTimeClock with Calendar)
- USB 2.0 Communication
- Mains charging adapter
- Vehicle supply cable

## DEVICE FUNCTIONS

- Peak value memory and differential measure
- Numeric-, graphic-display plus storage of all 6 channels at once
- Grafic design in different colours
- 5-digit numeric display including places after comma
- Many options of configurations for different measuring tasks
- Great choice of physical units
- PC-Software for Windows
- Updates of PC- und device firmware via Internet
- Factory calibration
- Custom specific software on request
- User-specific start-screen
